Two Year Old "POTOMAC" Planting

This folder, is printed and sent to you as a supplement to the one of The Ohio Small Fruit Improvement Association. As growers of Registered Disease Free Plants for the Association, we wish to make this more of a personal message rather than just a descriptive price-list. Also we wish to tell you of our strawberry and Potomac plants which are not handled by the Association.

As commercial growers of raspberries for fruiting on a rather large scale, we feel we know the value of good plants. We know the value of maintaining a patch for 6 to 8 years, of good stands and of large juicy fruit.

Diseased, short lived, run out patches, poor stands and seedy, dried up fruit were personal experiences with us 9 or 10 years ago and the reason we were so willing to co-operate with the Ohio Experiment Station and The United States Department of Agriculture, to develop disease free stock.

What followed is told in the accompanying folder and is common knowledge today among small fruit growers. By careful rogueing, clean plantations, followed by the organization of The Ohio Small Fruit Improvement Association and within a few years we proved to the public that a patch of raspberries could be maintained for 5 to 8 years, producing large yields of juicy fruit.

REGISTERED, the name given to plants of the Ohio Small Fruit Improvement Association, must be up to certain standards, not only as to freedom from disease but also as to size, root system, sturdiness of shoots and bunching and packing methods.

Do not confuse Registered with Certified. All plants offered for sale by any nursery are State inspected and Certified. Only plants of The Ohio Small Fruit Improvement Association are REGISTERED.

Perhaps the largest factor against the sale of Association plants, as value and fairness in price cannot

Well grown registered plants demand Pickers! — Plenty of them!

be disputed, is the few varieties we offer. It takes several years of intensive work to eliminate diseases and bring a variety up to our standards. Some varieties will never be developed to the stage we would like to have them. Those offered are the best that can be obtained in any grade of plants for both market and home use.

Yours Truly,
HILL AND SCHWEIZER.

Ohio Small Fruit Improvement Ass'n. Varieties and Price-list.

For general descriptions see Ass'n. folder. Write us personally any questions regarding varieties and cultural problems.

| No. of Plants | Cumberland | Black |
|-----------------------------|-------------|---------|
| | Plum Farmer | Beauty |
| 25—Post paid | \$ 1.25 | \$ 1.25 |
| 50 to 250 per 100 | 2.75 | 3.00 |
| 250 to 1000 per 1000 | 18.00 | 20.00 |
| 1000 to 2000 per 1000 | 16.00 | 18.00 |
| 2000 to 5000 per 1000 | 14.00 | 16.00 |
| 5000 and up per 1000 | 12.00 | 14.00 |

Prices for Newburgh are \$2.50 per 25; \$5.00 per 100; \$45.00 per 1000.

Prices guaranteed to March 15th, 1935, F. O. B. shipping point except in 25's. Deposit to accompany order. Net cash in full before shipment.

STRAWBERRY PLANTS

Although our business is Raspberries and raspberry plants, we grow several acres of strawberries for both plants and fruiting. Plants we sell are from new beds, digging the entire row and as good a lot of plants as we have ever grown.

General description of varieties offered except the Amanda, can be found in any nursery catalogue or from your State Extension bulletins. Amandas chief values are size, attractiveness and the fact that they bear late in the Season after most other berries are gone.

Prices on strawberry plants F. O. B. except on orders of 100 or less which are quoted Parcel Post prepaid.

| | |
|---------|--|
| Premier | } \$6.00 per 1000, \$3.50 per 500, \$2.00 per 250, \$1.25 per 100, 75c per 25. |
| Amanda | |
| Fairfax | } \$7.00 per 1000, \$4.50 per 500, \$2.50 per 250, \$1.50 per 100, \$1.00 per 25. |
| Dorsett | |

Suggestions for successful raspberry growing.

1. Plant disease free Registered Stock.
2. Maintain proper isolation.
3. Black-caps and red varieties should not be planted near each other.
4. All plants showing symptoms of disease should be promptly removed.
5. The entire planting should receive the best known cultural practices.
6. "Dont neglect summer pinching"
